

# CAT 6 UTP / 6A FTP RJ-45 Patch Panel

## Features

- Exceptional material properties and patch panel design.
- Packaging includes all necessary accessories for installation (labels, colored icons, organizers, cable ties, screws and nuts).
- Enables quick, easy and organized cable termination and patch panel labeling.
- It is possible to use UTP/FTP and shielded keystone jacks on patch panels.
- Compatible with 24 AWG and 26 AWG solid conductors.
- Complies with T568A and T568B standards.
- Grounding wire included.

## Physical Properties

|                         |                                              |
|-------------------------|----------------------------------------------|
| Conductor Gap           | 24/26 AWG, Solid or Stranded Cables          |
| Metal Frame             | Metal                                        |
| Connector Module Holder | Flame-retardant plastic component, UL 94 V-0 |
| Plastic Frame material  | Flame-retardant plastic component, UL 94 V-0 |
| Storage Temperature     | -20 to +80C                                  |
| Operating Temperature   | -40 to +60C                                  |
