CABLE MANAGEMENT PANELS

1 1U 19" Brush Cable Management Panel

2 1U 19" 5-Ring Cable Management Panel

3 1U 19" Covered Metal Cable Management Panel

DESCRIPTION

Cable Management Panels are professional solutions designed for cable management inside cabinets and racks in data centers and telecommunication rooms. They organize cables neatly, prevent cable congestion, and provide a tidy and professional installation.

Backed by a 25-year system performance warranty when installed as part of a complete ERAT structured cabling system.

TECHNICAL SPECIFICATIONS

Compatibility and Dimensions

Designed for 19-inch rack systems with a 1U height, ensuring compatibility with standard cabinets and rack enclosures.

Construction and Installation

Provides organized cable routing, simplifying cable management while improving accessibility during installation and maintenance.

Material and Structural Durability

Manufactured from durable metal for long-lasting performance and reliability.

Design

Prevents cables from sagging and minimizes dust entering the cabinet while ensuring safe and organized cable routing.

Applications

Provides effective cable management, reducing cable clutter and creating a cleaner, more organized cabinet layout for simplified maintenance and improved airflow.

Appearance

The brush-type design offers a neat interior appearance while contributing to organized cable routing. Cable management panels play an important role in cable organization and thermal management, helping ensure reliable long-term operation of installed equipment.
